

Thrombophilia Tests to Include in a Profile

- APLs
 - Lupus anticoagulant*
 - Anticardiolipin antibody
 - Anti- β_2 glycoprotein I
- APC resistance
 - APCR screen*
 - Factor V Leiden mutation
- Prothrombin G20210A
- Antithrombin*
 - Ag, chromogenic, clot
- Protein C*
 - Ag, chromogenic, clot
- Free protein S activity*
 - Clot-based or free Ag
- Factor VIII activity*
- Lp (a)?
- Homocysteine?
- MTHFR 667?
- FIX Padua?
- FII antithrombin resistance?

** Exclude if there has been a thrombotic event or anticoagulant Rx in the previous 10–14 days*
