

The Fritsma Factor

YOUR INTERACTIVE HEMOSTASIS RESOURCE

Cheat Sheet—November 1, 2022

Welcome to our November 2022 Fritsma Factor Cheat Sheet. On November 1, 2022, we move to a new provider with new skin, our first update since 2013. Our update moves us closer to our providers' [Precision BioLogic Inc.](#) and [Affinity Biologicals Inc.](#) formats while retaining our separate identity. We anticipate that all participants will move seamlessly to our new page. If you've managed a blog, you will know, of course, that many "bots" tend to fill your roster, so in case our migration function identifies you as a "bot," please rejoin with your preferred login and password. Contact me at george@fritsmafactor.com or [Elaine Benoit](#), PBI Marketing, for support. Thank you for your loyalty to Fritsma Factor as we enter a new era.

October 2022 Quick Question

Our October, 2022 Quick Question asked, "[What is your policy on underfilled tubes?](#)" This provocative question arose from a [September 20, 2022 discussion](#) raised by **Carolina Vilchez**, Rutgers University, and commented on by **Bob Gosselin** and **Drs. Emmanuel Favaloro** and **Paul Riley**. Click [October 2022 Quick Question](#) for the results and a summary.

Watch for a November Quick Question on our updated website, which will be posted by Monday, November 7 after our conversion "smoke" has cleared.

Coming Events

On September 18 we posted our "Coag Conversation" featuring **Karen M. Moser, MD**, entitled, "*Managing the Direct Oral Anticoagulants*" and on October 17 the second installment was posted. Click [The DOACs](#) for the first two segments of the three-part discussion. Conversation #3 will appear on November 17. Dr. Moser offers her considerable expertise in a "user-friendly" manner. Download her transcripts from the web site while attending our 25-minute presentations.

The next meeting offering hemostasis updates is the hybrid annual [American Society of Hematology \[ASH\] meeting](#), December 10–13 in New Orleans, Louisiana, USA. Join your fellow "clotters" at this unique North American venue.
