

The Fritsma Factor

YOUR INTERACTIVE HEMOSTASIS RESOURCE

Cheat Sheet—February 2025

Fritsma Factor and Precision BioLogic Inc. (PBI) together are looking forward to the [International Society for Laboratory Hematology annual meeting in Halifax](#), NS, May 7–9 just across the bay from PBI headquarters and labs. The recently commissioned [Halifax Convention Center](#) is a modern facility located in downtown Halifax near the waterfront, shopping area, and attractive hotels. We look forward to meeting you at the PBI booth.

January 2025 QQ: The PFA-100/200

The [January Quick Question](#) arose from a participant inquiry. **Brenda Goforth** asked, “Do most labs report the closure times rather than normal/abnormal, and do most labs stop at the CEPI when it is normal or automatically do both the collagen-epinephrine (CEPI) and collagen-ADP (CADP) results?” [Click here for the results of the poll](#) and further discussion.

February 2025 QQ: Factor Deficiency

Our [February 2025 Quick Question](#) is a quiz that asks, “What factor deficiency is associated with poor wound healing?” When you answer, please provide your suggestions in the comment section below the [Quick Question](#) announcement.

Fritsma Factor’s Educational Modules

Our mission is the effort to provide accurate and timely information, which includes our [Educational Modules](#), which several higher education facilities use for entry-level and advanced information. Check them out, and please respond with your comments, updates, and recommendations.

Differential Discussions

Click here to access our [Differential Discussions](#) interview featuring **Malissa Norfolk** and **David Calder** who assist me in a discussion of type 1 von Willebrand disease.

Thank you for your interest and participation in Fritsma Factor.
