

The Fritsma Factor

YOUR INTERACTIVE HEMOSTASIS RESOURCE

Cheat Sheet—December 2025

Welcome to our December 2025 [Fritsma Factor](#) Cheat Sheet. Here in the Northern Hemisphere, we enjoy our longest nights while our colleagues in Africa, Australia, South America, and all points south have lots of sunlight. Fritsma Factor and [Precision Biologic Inc](#) wish you a joyful December and peace and prosperity in 2026.

November 2025 QQ Summary: Stuart-Prower Factor

Navigate to the [summary of our November 2025 Quick Question](#) that asked, “Which is the Roman numeral for the Stuart-Prower factor?” Our participants earned high scores, and the summary attracted comments that both reviewed the history of coagulation factor nomenclature and raised some questions over the difficulties that our nomenclature create for providers.

December 2025 QQ: Control Proteins

Our December Quick Question is another quiz, this time asking, “[What plasma control protein acts against FIIa & FXa?](#)” Looking back, this may be the first QQ we’ve asked about the coagulation pathway control mechanisms such as antithrombin, proteins C, S, and Z, and tissue factor pathway inhibitor. Please select your answer and add your comments below. This Quick Question remains “pinned” to the top of our entries through December 31.

2026 Events and Conferences

If you are looking for a hemostasis-related conference, select [Events and Conferences](#). Our next coag-related conferences are [ASH, December 6–9, Orlando, Florida, USA](#), and [THSNA, March 19–21, Portland, Oregon, USA](#). Check the list to see if your conference appears—if not, kindly send your information to george@fritsmafactor.com.

If you would like a “push” copy of your own Cheat Sheet, complete with links to our numerous November posts, please complete the application form on the right. Our Cheat Sheets and access to Fritsma Factor are free. Fritsma Factor is sponsored by Precision BioLogic Inc. and the family of PBI providers including [Affinity Biologicals, Inc.](#) and [George King Bio-Medical, Inc.](#)
