YOUR INTERACTIVE HEMOSTASIS RESOURCE

Cheat Sheet—November 2026

Welcome to our November 2026 [Fritsma Factor](#) Cheat Sheet. We in the northern hemisphere are now entering our “chilly” months, ornamented with fall foliage. Down south, things are warming up. November and December are big months for hematology, hemostasis, and generalist meetings, please navigate to our [Event and Conference](#) calendar for full information. We’ve had a number of provocative and forward-leaning posts in October, links to which will appear at the bottom of the “push” version of this document.

Categories

All of our posts are categorized; many are cross-categorized to two or three topics. Navigate to the bottom of the home page to find the list of topics—you may find a post from 2016 that answers your question, or you may find one that no longer matches with current study outcomes and require an update that you can recommend.

October 2026 QQ; Antiphospholipid Antibodies

Our October 2026 Quick Question was a quiz that asked, [Which is NOT an antiphospholipid antibody?](#) No surprise—the majority of our participants chose the correct answer. Click here to access a summary post that includes a current open-access [Antiphospholipid Syndrome](#) review.

November 2026 QQ: Antifibrinolytic Therapy

Surgeons rely on antifibrinolytic therapy when prepping a patient for a potentially bloody procedure, and we are all aware that antifibrinolytics are part of the care provided for those with acquired or congenital bleeding disorders such as von Willebrand disease. Our November, 2026 Quick Question is a simple quiz that asks you to select the antifibrinolytic from a list of misleads. The quiz relies on the key reference, a time-honored favorite, *Murphy MC, Klein HG. Blood Component and Pharmacologic Therapy for Hemostatic Disorders in Kitchens CS, Kessler CM, Concle BA, Streiff MB, Garcia DA. Consultative Hemostasis and Thrombosis, 4th Edition, 2019.* Please add your comment describing your facility’s use of antifibrinolytics, which may include some that are not in the quiz.

Monthly Cheat Sheet “Push” Copy

If you would like a push copy of this monthly Cheat Sheet with links to our recent posts, please complete the application form on the right. Fritsma Factor is hosted by our family of hemostasis diagnostics providers, [Precision BioLogic](#), [Affinity Biologicals](#), and [George King Bio-Medical](#), and our informational services are gratis.
