

The Fritsma Factor

YOUR INTERACTIVE HEMOSTASIS RESOURCE

Cheat Sheet—June 1, 2022

Welcome to our June 2022 Fritsma Factor Cheat Sheet. Summer has finally arrived in North America, and we hope conditions are comfortable wherever you are, and that your Covid restrictions are growing less and less necessary.

May and June 2022 Quick Questions

Our May 2022 Quick Question asked, "What assay should be deleted from the thrombosis risk factor profile?" [See the results of our survey and comments](#). You may want to add your comments, as thrombosis risk testing profiles are constructed and employed differently in facilities around the world.

Our June 2022 Quick Question asks, "What viscoelastometry [VET] equipment is employed in your ER or OR?" I [Geo] will report your responses in my Wednesday, June 29, 2:45–3:45 presentation, "Operating Room Hemostasis Testing" at the [ASCLS Joint Annual Meeting](#) June 26–30 in Grand Rapids, Michigan, USA I will discuss VET's application to blood product and anticoagulant management. The conference is hybrid and will be available online, and I will post my handout on Fritsma Factor on June 8.

Coming Events

Watch Fritsma Factor for a Mid-June announcement introducing a three-part "Coag Conversations" webinar featuring **Brandon M. Henry, MD**, entitled "*What have we learned about inflammation and thrombosis since the COVID-19 outbreak?*" Dr. Henry is a physician scientist and investigative pathologist affiliated with the Cincinnati Children's Hospital Medical Center.

Please visit our [Conference Calendar](#), as many hemostasis conferences are scheduled for June, July, and August. The May 8–11 2022 World Federation of Hemophilia conference, held in Montreal, is past, but many of its presentations are available online. Besides ASCLS in June, ISTH meets July 9–13 in London, AACC July 24–28 in Chicago, and THSNA, August 16–18 in Chicago. Watch for the Precision BioLogic Inc booth at THSNA.

Thank you for your loyalty to The Fritsma Factor.
